This diagram shows the assembly of the front of the car. The white nose and red front wing are being attached to the black chassis. The chassis has a central circular hole and a small black pin labeled '24' at the front. The front wing is a black component with a white endplate. The nose is a white component with a red base. The chassis is shown in a perspective view, with the front wing and nose being placed on top of it. The front wing is attached to the chassis by a small black pin. The nose is attached to the chassis by a small black pin. The chassis is shown in a perspective view, with the front wing and nose being placed on top of it. The front wing is attached to the chassis by a small black pin. The nose is attached to the chassis by a small black pin.

9

Diagram 9 illustrates the assembly of the motor and gear train. The components shown are:

- 25-26 TAMIYA TS29**: A black plastic motor housing.
- 27-28 TAMIYA TS38**: A silver metal gear.
- TAMIYA X11**: A small black gear with a red dot.
- 29-30**: A small black gear with a red dot.
- TAMIYA TS29**: A small black gear with a red dot.

The diagram shows the motor housing (25-26) being attached to the gear train. The gear train consists of the silver gear (27-28) meshing with the small black gear (29-30), which in turn meshes with the small black gear (TAMIYA TS29). The small black gear (TAMIYA X11) is also shown meshing with the silver gear (27-28).
